

Gentlemen

After reviewing the data on PLC technology, I must voice my opposition to this technology being implemented nationwide. If this technology is implemented, this will be a severe impairment to HF Amateur Radio Communication raising the noise floor to the point where weak signal work and even, most importantly, Emergency Communications could be severely obstructed. I am in concurrence with the comments filed with the American Radio Relay League Inc. The advocates of this technology being implemented have not, in my opinion, compared the full ramifications to HF Amateur Radio Communications.

Thank you for your time to read and consider my opinion.

James D. Davis

Amateur Radio Station - KT4WX

FCC General RadioTelephone License Number - PG-6-31658

Technical Coordinator - ARRL West Central Florida Section

Chief Engineer - K4WCF Repeater System
